WELCOME TO THE AI4TEACHERS PROJECT!

RETHINKING TEACHING AND LEARNING IN THE AGE OF ARTIFICIAL INTELLIGENCE

2025-1-HU01-KA210-SCH-C16B82C9

LEADERSHIP

Artificial Intelligence is rapidly transforming education, offering new opportunities to make teaching more engaging, creative and efficient. Yet many educators feel they lack the confidence, knowledge and practical skills to integrate AI into their classrooms responsibly.

The AI4TEACHERS Erasmus+ project brings together partners from Hungary, Greece, Cyprus and Italy to support teachers in embracing Artificial Intelligence as a valuable educational tool. Through innovative training resources, a Massive Open Online Course (MOOC), a practical handbook and international collaboration, the project aims to strengthen teachers' digital competences while promoting ethical and pedagogically sound use of AI in schools. The project's objectives include improving teachers' AI literacy, encouraging innovative classroom practices, supporting educational decision-makers, and ultimately enhancing students' learning experiences.

OUR OBJECTIVES

✔ Promote AI literacy among teachers through continuous professional development.
✔ Support teachers in using AI tools responsibly and effectively in classroom practice.
✔ Make learning more engaging, creative and motivating.
✔ Support school leaders and policy-makers in understanding the educational value of AI.
✔ Develop practical AI resources that can be used across Europe.

AI4TEACHERS

MEET THE PARTNERSHIP

Together, the consortium combines expertise in education, teacher training, educational policy, digital learning and Artificial Intelligence to create high-quality European learning resources.

- St. Imre Catholic Primary School and the Good Shepherd Kindergarten (Hungary)
- The Directorate of Primary Education in Heraklion, Crete (Greece)
- CISES srl (Italy)
- Edinet Research & Development Ltd. (Cyprus)

OFFICIAL KICK-OFF MEETING

The **AI4TEACHERS** consortium officially launched the project during its Kick-off Meeting held in **Bologna, Italy.**

Representatives from all partner organisations met to establish a common vision for the project, define implementation strategies and agree on the roadmap for the coming 18 months.

During the meeting, partners:

- presented their organisations and expertise
- reviewed the project's objectives and expected outcomes
- discussed quality assurance and project management
- planned dissemination and communication activities
- agreed on the development timeline for the AI4TEACHERS MOOC and Handbook
- defined the first research and content development activities.

The meeting marked the beginning of an exciting European collaboration dedicated to helping teachers confidently navigate the opportunities and challenges of Artificial Intelligence in education.
